

Sales Analytics Dashboard

Technical Documentation & Data Reference Guide

Figure 1 – LAM Lmt. Sales Analytics Dashboard (2023–2024)

Project	LAM Lmt. Sales Analytics Dashboard
Coverage Period	January 2023 – December 2024 (24 months)
Dataset Records	480 transaction records across 14 fields
Dashboard File	LAM_Lmt_Sales_Dashboard.xlsm (Excel macro-enabled workbook)
Data Source	DataSet.xlsx (raw transactional data)
Prepared By	Analytics Team – LAM Limited

1. Executive Summary

This document provides a comprehensive technical and analytical reference for the LAM Lmt. Sales Analytics Dashboard, an interactive Excel-based reporting tool built to track and analyze sales performance, customer behavior, service mix, and profitability across two fiscal years (2023 and 2024). The dashboard consolidates 480 transactions into dynamic visualizations supported by macro-driven interactivity.

Key performance highlights show a strong growth trajectory: total revenue increased from AED 1,259,329 in 2023 to AED 1,794,875 in 2024 — a **42.5% year-over-year growth**. Margin performance remained healthy with a portfolio-wide average of 30.63%, generating AED 931,585 in total margin. The customer base comprised 182 new sale records and 298 repeat sale records, underscoring solid retention alongside active acquisition.

Total Sales	Total Margin	Avg Margin %	New Sales
3,054,204	931,585	30.63%	182
AED	AED	Portfolio-wide	Transaction records

The dashboard supports year-based filtering, enabling stakeholders to isolate 2023 or 2024 performance or view the combined two-year picture. Five services (SEO, Web Development, Ads, App Development, and Social Media) are tracked across three internal departments (Design, Marketing, and Copywriting) operating in five UAE cities.

2. Data Structure & Dictionary

The raw dataset (DataSet.xlsx) contains **480 rows** of transactional sales data spanning January 2023 to December 2024, with **14 columns** described below. The same schema is embedded in the *Salesdata* sheet of LAM_Lmt_Sales_Dashboard.xlsm.

#	Column Name	Data Type	Description	Example Values
1	Date	Date	Transaction date (Excel serial number)	44927 → 01-Jan-2023
2	Month	Text	Abbreviated month of the transaction	Jan, Feb, ... Dec
3	Year	Integer	Calendar year of the transaction	2023 / 2024
4	Customer Name	Text	Name of the client (company or individual)	Vantoro Enterprises
5	Customer Type	Text	Whether client is a Company or Individual	Company / Individual
6	Service	Text	Service type purchased	SEO, Web Dev, Ads...
7	Department	Text	Internal department that delivered the service	Design, Marketing, Copywriting
8	City	Text	UAE city where the sale was made	Dubai, Abu Dhabi...
9	Sales Amount	Numeric	Gross revenue for the transaction (AED)	3,125 – 8,000+
10	Margin %	Decimal	Profit margin ratio (25%, 30%, 35%, or 40%)	0.25 / 0.30 / 0.35 / 0.40
11	Margin Amount	Numeric	Absolute margin in AED (Sales × Margin %)	937.5, 1,200.5...
12	Sale Type	Text	New Sale = first-time; Repeat Sale = returning	New Sale / Repeat Sale
13	Customer Source	Text	Acquisition channel for the customer	Ads, Organic, Walk in
14	Package Type	Text	Billing frequency for the service package	Monthly, Quarterly, Bi Annual, Annual

• **Insight:** Margin % takes only four discrete values (25%, 30%, 35%, 40%) — aligned to service tier pricing. This enables clean margin banding in pivot analysis.

3. Dashboard Components & Visualizations

The LAM_Lmt_Sales_Dashboard.xlsm workbook contains an interactive dashboard with seven visualization panels and a KPI summary bar. A year slicer (2023 / 2024) filters all visuals simultaneously.

Panel	Chart Type	Dimensions Shown	Key Insight
KPI Bar	Metric Cards	Total Sales, Total Margin, Avg Margin %, New & Old Customers	Instant snapshot of top-line performance
Sales Trend	Line Chart	Monthly sales over 24 months (Jan 2023 – Dec 2024)	Clear mid-year spike every year (Jul–Aug surge)
Customer Source	Stacked Bar Chart	Sales by source (Ads, Organic, Walk-in) per year	Organic & Walk-in overtook Ads in 2024
Sales by City	Donut Chart	Revenue share per UAE city	Dubai leads at 30%; Abu Dhabi second at 26%
Sales by Service	Column Chart	Revenue per service line	SEO is the top revenue driver at AED 814,320
Department Margin	Pie Chart	Margin share by department	Design dominates at 47% of total margin
New vs Old Sales	Dual-Line Chart	Monthly trend: new vs repeat sales	Repeat sales consistently outpace new sales
Top 10 Customers	Horizontal Bar	Top 10 clients by cumulative sales	Vantoro Enterprises is #1 at AED 190,001

4. Sales Performance Analysis

4.1 Year-over-Year Comparison

Revenue grew significantly from 2023 to 2024, driven by increased transaction values in the second half of each year.

Metric	2023	2024	Growth
Total Sales (AED)	1,259,329	1,794,875	+42.5%
Total Margin (AED)	382,557	549,028	+43.5%
Avg Margin %	30.63%	30.63%	0.0%
Transaction Records	240	240	Equal

• **Insight:** The equal transaction count (240 per year) with higher 2024 revenue implies higher average deal value in 2024, not more deals — suggesting up-sell or premium package adoption.

4.2 Monthly Sales Trend

Both years exhibit a pronounced mid-year spike in July–August, followed by sustained elevated sales through year-end. The first half is consistently softer.

Month	2023 (AED)	2024 (AED)	YoY Change
Jan	75,431	104,397	+38.4%
Feb	77,811	97,872	+25.8%
Mar	83,128	100,676	+21.1%
Apr	86,156	103,919	+20.6%
May	74,974	96,646	+28.9%
Jun	79,856	109,598	+37.2%
Jul	129,309	205,529	+58.9%
Aug	130,458	200,458	+53.7%
Sep	137,643	187,977	+36.6%
Oct	123,722	204,076	+64.9%
Nov	128,128	184,503	+44.0%
Dec	132,713	199,224	+50.1%

- **Insight:** July 2024 recorded the single highest month at AED 205,529 — a 59% jump vs July 2023 (AED 129,309). Highlighted rows (Jul, Aug) mark the peak season pattern.

5. Geographic & Service Analysis

5.1 Sales by City

City	Sales (AED)	Share	Key Observation
Dubai	908,396	30%	Highest revenue city; strong Web Dev and Design concentration
Abu Dhabi	793,228	26%	Second largest; even service mix across all 5 service types
Ajman	486,716	16%	Strong App Dev and Social Media activity
Al Ain	462,951	15%	Balanced split between SEO and Web Dev
Sharjah	402,913	13%	Smallest share; growth potential identified

5.2 Sales by Service Type

Service	Revenue (AED)	Revenue Share	Notes
SEO	814,320	26.7%	Top revenue driver; handled by Copywriting dept
Web Dev	634,316	20.8%	Second-largest; high-margin at 35% per transaction
Ads	583,377	19.1%	Marketing dept; 25% margin tier
App Dev	534,926	17.5%	Design dept; highest margin at 40% per transaction
Social Media	487,265	16.0%	Marketing dept; 30% margin tier

• **Insight:** App Dev has the highest margin % (40%) but is ranked 4th in revenue — increasing App Dev volume is the highest-ROI lever for margin improvement.

5.3 Department Margin Breakdown

Department	Margin (AED)	Share	Service Mix
Design	435,981	47%	App Dev + Web Dev transactions; 35–40% margin tier
Marketing	292,024	31%	Ads + Social Media; 25–30% margin tier
Copywriting	203,580	22%	SEO-focused; 25% margin tier despite high revenue

6. Customer Analysis

6.1 Top 10 Customers by Cumulative Sales

Rank	Customer Name	Type	Total Sales (AED)
1	Vantoro Enterprises	Company	190,001
2	Synergenix Labs	Company	174,699
3	InfiNova Technologies	Company	159,606
4	Octavium Digital	Company	153,528
5	Fatima Saeed	Individual	144,481
6	Stratoscope	Company	126,675
7	Aetherion Systems	Company	125,250
8	Rania Omar	Individual	121,631
9	Altura Networks	Company	117,796
10	Zephyr Industries	Company	117,139

• **Insight:** 8 of the top 10 customers are companies. Fatima Saeed and Rania Omar are the only individuals in the top tier, indicating high individual customer lifetime value worth nurturing.

6.2 Customer Acquisition Source

Customer acquisition channels shifted meaningfully from 2023 to 2024, with Organic and Walk-in sources surging while Ads-driven revenue declined.

Source	2023 (AED)	2023 %	2024 (AED)	2024 %	Change
Ads	452,192	35.9%	412,852	23.0%	-8.7%
Organic	416,190	33.0%	682,929	38.1%	+64.1%
Walk in	390,947	31.0%	699,094	38.9%	+78.8%

• **Insight:** The dramatic rise of Walk-in (79%) and Organic (64%) in 2024 suggests improving brand awareness and reputation. Budget may be safely reallocated from paid Ads campaigns.

6.3 Package Type Distribution

Package Type	Revenue (AED)	Share	Observation
Monthly	837,766	27.4%	Highest revenue share; likely small-to-mid clients on short cycles
Quarterly	743,807	24.4%	Balanced; popular across all service types
Annual	743,251	24.3%	Strong long-term commitment, nearly equal to Quarterly
Bi Annual	729,380	23.9%	Closest to equal distribution — healthy package diversity

7. Technical Specifications

7.1 File Inventory

File Name	Type	Purpose
DataSet.xlsx	.xlsx	Raw transactional data source — 480 rows × 14 columns
LAM_Lmt_Sales_Dashboard.xlsm	.xlsm	Interactive Excel dashboard with pivot tables, charts, and VBA macros
Dashboard_Screenshot.png	.png	Static visual reference of the dashboard layout (1294 × 528 px)

7.2 Dashboard Architecture

The macro-enabled workbook (.xlsm) is structured with at least two sheets: the raw *Salesdata* sheet mirroring the *DataSet.xlsx* schema, and the dashboard sheet containing Pivot Tables, charts, and interactive controls. VBA macros handle the year-slicer button logic, dynamically filtering all PivotTable data sources and refreshing charts on click.

Component	Role
Salesdata Sheet	Source data layer — raw transactional records; used as PivotTable data source
Dashboard Sheet	Presentation layer — all 8 visual panels, KPI bar, and year slicer buttons
PivotTables	Intermediate calculation layer — aggregations by month, city, service, source, customer
VBA Macros	Interactivity layer — year filter buttons (2023 / 2024) trigger data source updates
Charts	Visualization layer — linked to PivotTables; auto-refresh on filter change

7.3 Software Requirements

Requirement	Version/Setting	Notes
Microsoft Excel	2016 or later	Required — macro execution and PivotTable rendering
VBA Macros	Must be enabled	Required — year-filter buttons will not function without macro trust
Operating System	Windows / macOS	Compatible with both; best on Windows Excel
Screen Resolution	1280 × 768 min.	Recommended for proper dashboard panel display

8. Key Insights & Strategic Recommendations

- 1

Revenue Growth

[\[Price & Package Strategy\]](#)

42.5% YoY growth (AED 1.26M → 1.79M) with equal transaction volumes confirms higher average deal values in 2024. Focus on maintaining or increasing deal value through premium package migration.
- 2

Seasonal Peaks

[\[Seasonal Campaign Planning\]](#)

July–August accounts for the highest monthly revenues in both years. Consider pre-season capacity planning, targeted promotions in May–June, and retention campaigns in Q1 (soft months Jan–May).
- 3

App Dev Margin Opportunity

[\[Service Mix Optimization\]](#)

App Dev carries the highest margin rate (40%) but ranks 4th in revenue. A dedicated App Dev sales push could significantly boost total margin without requiring more transactions.
- 4

Organic & Walk-in Growth

[\[Acquisition Channel Strategy\]](#)

Combined Organic + Walk-in revenue grew from AED 807,137 in 2023 to AED 1,382,023 in 2024 (+71.2%). Paid Ads declined in share. Redirect ad spend to brand building and referral programs.
- 5

Repeat Sales Dominance

[\[Customer Retention & Upsell\]](#)

298 repeat sale records vs 182 new sales (62% vs 38%) indicates strong customer retention. A formal loyalty or upsell program could further monetize this retention strength.
- 6

Geographic Concentration

[\[Geographic Expansion\]](#)

Dubai and Abu Dhabi account for 56% of revenue. Sharjah at 13% is under-penetrated despite its proximity and population. A Sharjah-specific outreach campaign has high upside.
- 7

Top Customer Concentration

[\[Account Management & Diversification\]](#)

Top 10 customers represent a significant portion of revenue. Vantoro Enterprises alone contributed AED 190,001. Diversification of the customer base reduces concentration risk.

9. Dashboard Usage Guide

Step 1	Open the Workbook Open LAM_Lmt_Sales_Dashboard.xlsm in Microsoft Excel 2016+. When prompted about macros, select 'Enable Content' to activate the year-filter buttons.
Step 2	Navigate to the Dashboard Click the Dashboard tab (sheet tab at the bottom). The dashboard will display combined 2023–2024 data by default.
Step 3	Filter by Year Click the '2023' or '2024' button in the top-left Year panel to filter all charts and KPI metrics to the selected year. Both years are shown simultaneously when neither is exclusively selected.
Step 4	Interpret the KPI Bar The top metric strip shows Total Sales, Total Margin, Average Margin %, New Customers, and Old Customers — all dynamically updated based on the year filter.
Step 5	Read the Charts Each chart is linked to a PivotTable. Hover over data points for exact values. Charts refresh automatically when the year filter changes.
Step 6	Update with New Data To add new transaction data, append rows to the Salesdata sheet following the same 14-column schema. Then right-click each PivotTable and select 'Refresh' to update all charts and KPIs.
